

Information & Instructions:: Release of oil and gas lease

PREVIEW

1. A lease may expire either due to the fact that a well was not drilled during the primary term, or during the secondary term after oil and gas production has ceased to be produced in paying quantities, by agreement or otherwise.
2. Thereafter, a release should be filed in the real property records.
3. The release will then notify landmen and others searching the title that the property is no longer subject to the previously recorded lease.
